Make your remittance by Postoffice Money Order, Express Money Order or New York or Chicago Bank Draft; these three methods are absolutely safe.
If lost a duplicate can be had from the issuing office; you may select any packet of Seed to cover the cost of your remittance. Do not send personal checks on your local bank, it costs 15 to 25 cents to collect them. The proper remittance must in all cases accompany the order. It will save me time and you worry.

New Ever-Blooming Allegheny Fringed Hollyhocks
Blooms the First Year From Seed.

A New Type of Hollyhocks.

THIS grand new new flower is a decided improvement in more than one particular over the old-fashioned variety. Its finest point of merit is the fine transparent fringed Chrysanthemum-shaped flowers; which look as though they were made up of crushed silk; so fine are these flowers in texture that one would never suspect they were related to the old-style Hollyhock.
One has to see this plant in bloom to appreciate its clear, transparent colors, which make a row shine with rainbow effect. We advise everybody who has a garden no matter how large or small to sow a packet of seed of this beautiful plant.

The "Allegheny" is a perpetual bloomer, as it has from two to four buds at base of each leaf where the old style has only one. All of these buds develop into flowers in rotation, the largest buds first, then the smaller ones, and so on until they have all opened up to beautiful flowers. This is the greatest novelty among flowers for years. The great height of the column, like pyramidal spikes, thickly studded with flowers, adds materially to the decorative value, and unless one has seen this new plant in bloom, a porch one would never suspect the Allegheny of ornamental possibilities of the Hollyhock. If watered well they grow wonderfully high, if watered scantily or not at all they grow to a less height. As cut flowers they are immense. A plate filled with these flowers is a handsome thing to look at, and as flowers to wear they are wonderfully lastng. The colors are shell pink, rose and ruby red, a shade or two deeper at the center, and exquisitely tinted towards the edge. The flowers do not, as on the other double Hollyhock, rot on the stems, but drop as soon as they fade. The illustration gives an idea of these flowers, but does not nearly do them justice, as the fine graceful appearance and peerless shading cannot be reproduced; each color is found only in silks. Extra choice mixed seeds. Price, 10 cents per pkt., 3 pkts. for 25 cents.

**VIOLAS OR NEW TUFTED PANSIES.**

For years these hardy, tufted Pansies have grown in England, where they are most extensively used for borders, but they were always propagated by cuttings. I have succeeded in securing a limited amount of seed. The plants grow in dense, compact little bushes, which are completely covered with their bright flowers from early Spring until late in the Fall. The colors range in all shades of white, pink, blue, yellow, violet and purple, as self-colors, or in combinations. It is a decorative plant of the highest order, and we feel sure it will soon be as universally grown in this country as it has been for years in England. Per pkt 10 cts, 3 pkts 25 cts.

**NEW GIANT RUFLLED PANSY, "MASTERPIECE."**

This superb new Pansy is distinct from all others in the form of flowers, the border of every petal being conspicuously undulated and curled, as shown in our illustration. The flowers are extremely large and nearly all of them exhibit this peculiarity. The curled petals give the flowers a fuller and more globular appearance than those of other classes of Pansy. This new class is remarkable also for the wonderful combinations of color which it shows, including some tints hitherto unknown in Pansies. The plants are very vigorous and bloom profusely. Per pkt 25 cts.

SEEDEWOMAN AND FLORIST.
COSMOS NEW GIANT VARIETIES.

COSMOS, NEW GIANT FANCY—This new strain of Cosmos is notable both for purity of color and the gigantic size of its flowers. The broad petals overlap each other, producing perfectly circular flowers of splendid substance, which measure 4 inches across, sometimes even reaching 5 inches in diameter. Pkt. 10 cts., 3 pkts. 25 cts.

COSMOS, NEW YELLOW—A distinct new variety, with beautiful yellow flowers, blooming from early Summer to late in the Fall. Pkt 10 cts.

COSMOS, NEW GIANT WHITE AND PINK—Very grand and beautiful; giant flowers, of purest white, sometimes very lightly tinged with pink. pkt. 5 cts.

COSMOS, THE KLONDIKE, New—The so-called Yellow Cosmos which I never offered is not a Cosmos at all! It is simply the old small-flowered Bidens feruloides. This variety from Mexico, now first introduced, produces at Fordhook the past Summer magnificent bright yellow flowers, 5½ to 6 inches in diameter. pkt. 10 cts., 3 pkts. for 25 cts.

COSMOS DAWN—This new variety comes into bloom in July and continues to flower until cut down by severe frost. Of good size; the handsome circular flowers are white, with a delicate tint of rose at the base of the petals. The plants are of a compact, bushy growth, about four and one-half feet. Valuable particularly for the North, where the seasons are too short for other strains. per pkt. 10 cts. 3 pkts. for 25 cts.

MARGUERITE CARNATIONS, CALIFORNIA GIANTS—This is a greatly improved strain of the New Marguerite Carnation, which is so popular because it produces fine, fragrant, double flowers in only four months from seed. The plants are dwarf and compact, though of vigorous growth. Comes into bloom earlier than the Marguerites. Produces much larger and more finely double flowers, continue to bloom profusely until the flower buds are destroyed by heavy frosts. Finest colors, mixed, per pkt. 15 cts., 2 pkts. for 25 cts.

NEW DWARF MARGARET CARNATION—Like its parent, the Margaret, this Carnation blooms in 4 months from sowing, but it is much in advance of the type as the new French Cannas are ahead of the old "Indian Shot." The flowers are larger, more double and the variety of colors is infinitely greater. The plants grow about 15 inches high, flowers always erect. If taken up in the Fall, the plants bloom all Winter. pkt. 10 cts., 3 pkts. for 25 cts.

CALCEOLARIA, PRIZE STRAIN—The blooms are remarkable for their oddness of shape, for their size, and for richness, diversity and delicacy of coloring. CHRYSANTHEMUM TRICOLOR; MIXED VARIETIES—(See Pkt. Description) and valuable for cut flowers. pkt. 3 cts.

CHRYSANTHEMUM INODORUM PLENISSIMUM—Although a perennial, it flowers abundantly the first year from seed, each plant producing hundreds of beautiful, perfectly double snow-white flowers. pkt. 3 cts.

CHRYSANTHEMUM PERENNIAL—As grown formerly in the old-time garden these were entirely hardy, the plants living out during the winter and flowering before frost in the fall. They have been hybridized and improved greatly in size, form and colorings by the florists, but with a loss of hardiness and blooming at a later period in the fall, needing the protection of a greenhouse to bring them to full development, except in especially favored locations. By planting these fine varieties in California in the open ground I have secured a strain of seed, which, sown in the open ground early in the spring at Fordhook Farms, produces fine plants which flower quite freely in the fall. They are entirely hardy, living out all winter and growing strong-er each year, and at the same time produce flowers more than double the size of the old-fashioned varieties, while they embrace all the distinct types of flowers and many of the rich shadings of color seen in the finest greenhouse varieties. per pkt. 10 cts., or 3 pkts for 25 cts.

CHRYSANTHEMUM, GOLDEN FEATHER—The dark velvety disk in the center is surrounded by a circle of bright golden yellow, followed by another clear-cut circle of crimson; beautiful golden foliage. pkt. 5 cts.

DAHLIAS.

Dahlias are grown easily from seed, flowering freely the first season. Sow the seed thinly in drills one-half inch deep in the hot-bed, or in shallow boxes of rich soil in the house early in the Spring. When well started transplant to other boxes or small flower pots, and transplant to the open ground when the trees are out in full leaf, setting the plants two feet or more apart each way. Furbish each plant with a stout stake, and trim off the side shoots so as to throw all the strength into the central stem to produce early flowering. In the fall the tops may be cut off, the bulbs dug and wintered in a warm cellar. Plants raised from seed will give a wide range of beautiful colorings, and nearly all the plants will produce fine double flowers. Many gardeners admire the single flowers, even more than the double ones.

EXTRA CHOICE, LARGE FLOWERING DOUBLE—This splendid strain is saved from a large collection of perfectly double varieties. pkt 10 cts, 3 for 25 cts.

SUPERB SINGLE DAHLIAS—These are easily raised from seed; they begin to flower in July. pkt 10 cts.

**CHRISTINE DE NOUE, New—**This is a great Winter-blooming Rose, with buds and flowers of the largest size. Color, richest crimson. The best Rose of its color.

**GENERAL ROBERT E. LEE—**This Rose which was introduced the past Spring, will produce more beautiful Roses in the Winter than any Rose grown. A small bush will produce hundreds of blooms. Color, orange yellow, very rich and beautiful. Extra fine.

**KAISERIN AUGUSTA VICTORIA—**A new pure white Rose. It is very large and double. A Royal Rose in every respect. A Rose I can recommend.

**STAR OF GOLD—**This is the best all-round deep, golden yellow Tea Rose that is grown. The buds are very large and shapely, while the flower is double to the center, and it is borne in the golden yellow than Marechal Niel. Don’t fail to try it.

REMEMBER—I will send this entire Collection of 8 “Christmas” Blooming Roses for only 50 Cts., costing separately over $1.00 if purchased elsewhere. Three “Christmas” Collections for $1.25, by mail, postpaid.

**SPECIAL PREMIUM—**To every person ordering both the “GEM” and “CHRISTMAS” Collections, I will give, free, the New California Rose, SANTA ROSA. Its flowers are a rich, shell pink, flushed with crimson.

Price, 20 cents each, when ordered alone.
CLIMBING METEOR—The New Rose now introduced for the first time, might more properly be called a Perpetual Blooming Climbing General Jacqueminot. Though a sport from the finest of all Hybrid Texas Meteor—It is much larger, and of a deeper rich color, equalled only by the peerless Jacqueminot, and will produce twenty blossoms to Jacqueminot’s one. It is a Rose which will make ten to fifteen feet color in a season, and show a profusion of bloom every day. Pelage, strong, healthy and luxuriant. Buds exquisite; flowers, large, beautifully shaped, and of that rich, dark velvety crimson color seen only in the Jacqueminot. Much deeper and richer than Meteor. I do not hesitate to pronounce it the finest Rose in existence for Summer blooming, as it will make a large growth and is loaded with its glorious blossoms all the time. For Winter blooming it has few equals in beauty and probably none in profusion. Just the Rose to train up in a conservatory or bay window, where its exquisite blossoms will show to wonderful advantage. Price, 10 cts each, 3 for 25 cts; large, two-year-old plants, 50 cts each.

EMPERESS of CHINA, the New Perpetual Blooming Climbing Rose—It commences to flower early in Summer and from that time until late in the Fall blooms continuously. It is entirely hardy, having withstood a temperature of 16 degrees below zero unprotected by injury. In habit of growth it is vigorous, and in this respect is unsurpassed; small plants will make a growth of 6 to 8 feet in a single season. The flowers are of medium size, very graceful in form and highly fragrant. The bud is pointed and very shapely and is borne on long, stiff stems. Color, a soft dark red and as the flower expands changes to an apple blossom pink. Think of Roses from May to December! It is surely the Rose for amateurs, as it needs but slight attention and no protection. Price, 15 cents; large, two-year-old plants, 60 cents.

GLORIE de DIJON—Our Southern friends are unbound in their admiration of this fine Rose, which is seen here in its fullest perfection, being hardy in their section. Where it is used as a pillar Rose. It is noted for the great size of its flowers, delicate Tea scent and its exquisite shades of color, being a blending of amber, carmine and cream. One of the finest Roses on our list. Price, 16 cents each; large, two-year-old plants, 50 cents each.

WALTHAM QUEEN—A splendid new, climbing Rose Hardy in the North. It is a strong grower and continuous bloomer. Flowers, large, full and sweet. Color, a rich scarlet crimson, beautiful, a profuse bloomer. Nothing can compare with it for beauty of bud and foliage, and profusion of its rich, red flowers of magnificent size. Price, 15 cents; large size, 35 cents.

MINATURE FAN PALM, LIVISTONA ROTUNDIFOLIA—Resembling Latania Borbonica, very much more dwarf and compact in habit, and having much smaller and handsome leaves, which are of the most perfect shape. The leaves are circular in form, only about eight to ten inches in diameter, and deeply toothed. Very small plants throw up an unusual number of these beautiful leaves, furnishing the plant, making very perfect specimens when only a foot high—plants of this height having as many as a dozen well developed, perfect leaves. It makes a lovely plant for table decoration. No Palm makes such perfect specimens when small, so it has a distinct place among decorative plants, and is a charming addition to the limited number of plants really adapted for house decoration.

Plants of hardy constitution and adaptable to the severest positions, within or without doors; appreciated by all the lovers of the conservatory. With age the plant attains noble proportions, and becomes very valuable. When too large for the house it can readily be sold.
